

WEBINAR REGISTRATION: Safety Not Stigma: Reframing the Way We Talk about Guns and Violence

Mental Health America's Regional Policy Council is hosting a webinar entitled, Safety Not Stigma: Reframing the Way We Talk about Guns and Violence on **Wednesday, December 12, 2018 at 2:00 pm Eastern time/ 11:00 am Pacific time.**

While it is well documented that media coverage of gun violence misrepresents the linkage to mental illness in ways that contribute to stigma against those living with mental illnesses, emerging practices and policies are creating a different reality “on that ground”, one that has the potential to unite, not divide, the mental health community and the gun-owning community. This webinar will explore the following:

- Guns and Suicide: the real intersection of gun violence and mental illness.
- Partnering with the gun-owning community to promote safety.
- Public policy that reduces suicide by firearms while respecting rights of responsible gun owners.

Please complete the below registration form for the webinar and remember to mark your calendar!

Thank you for joining us for this special opportunity to learn about [community violence](#) and responsible ownership of guns.
